

# Bennett Garcia

bennett.garcia@rutgers.edu • 973.722.9338  
[bennetts.work](https://bennetts.work) • [github.com/ttenneb](https://github.com/ttenneb)

Software Engineer with a rigorous math background & experience building distributed systems.

## WORK EXPERIENCE

---

### Hyperscience

Remote / New York City, New York

*Software Engineer - Flows Team*

*February 2025 – Present*

- Lead developer for \$1M+ contracts, owning workflows that process 100k+ documents daily.
- Design and implement automated, distributed, high-volume workflows (Conductor/Python) for critical medical and financial document processing, consistently meeting stringent SLAs.
- Engineered internal developer tools, reducing the time-to-market for custom client workflows.
- Design and deploy cloud-native PoCs across diverse platforms AWS, GCP, Azure, & IBM.

### Oracle Cloud Infrastructure

Redwood Shores, CA

*Software Engineer - Source Control Management Team (SCM)*

*August 2023 – December 2024*

- Developed Oracle's new source control management system built in Java on JGit and OCI.
- Lead developer on the migration of 30k+ Oracle repositories from existing Git platforms to OCI's new SCM system, seamlessly transitioning 100s of teams and 1000s of developers.
- Built a distributed system to continuously update 30k+ migrated Git repositories daily.
- Implemented backend features and internal APIs to support the users' migration experience.
- Rotated on-call: analyze service metrics, mitigate service issues, and improve on-call tooling.

*Software Engineer Intern - Compute Team (Backend)*

*May 2022 - August 2022*

- Developed a Python application to monitor VM usage by aggregating telemetry APIs for real time efficiency analysis.

*Software Engineer Intern - Console Team (Frontend)*

*May 2021 - August 2021*

- Built React.js components to display QR codes and information for the OCI mobile app.
- Extended event-based data-tracking to support more robust AB-Testing.

### Rutgers Rail and Transport Lab

Rutgers University

*Software Engineer - Lead Undergraduate Developer*

*September 2021 – November 2022*

- Led a team of 12 developers to build an application for lab workers validating YOLO object detection outputs, processing 100k+ railway detection events for anomaly identification and video validation.
- Implemented a Python-based multi-processing workflow manager for an ensemble of computer vision models, labeling anomalies from YOLO outputs.
- Mentored undergraduate developers on OpenCV, Scikit, and PyTorch.
- Dockerized and deployed backend/frontend services and managed PostgreSQL on AWS.
- Built a user interface with React and Node.js to manage model workflows and streamline manual video data validation.

### The Coder School

Short Hills, NJ

*Programming Teacher*

*December 2019 – January 2021*

- Taught coding classes of 1-10 students, from ages 7-17, using Scratch, Python, Java, and more.

## George Street Co-op

*Director and Committee Chair*

New Brunswick, NJ

*September 2021 – August 2023*

- Appointed to the Board of a 50+ year-old grocery co-op serving an NJEDA-designated food desert.
- Rewrote bylaws to enhance democratic governance and managed an electronic voting system.

## EDUCATION

---

### Rutgers University

New Brunswick, NJ

*Computer Science, B.S. & Mathematics, B.S.*

*August 2023*

- **Total GPA: 3.5/4.0, CS GPA: 3.9/4.0** *Awarded position in Professor Imielinski's Data [Hall of Fame](#)*
- **1st place, HackRU** Implemented the N.E.A.T algorithm to train neural networks using evolutionary techniques. Selected to mentor subsequent Hackathons teams.
- **Sample Coursework:** Algorithm Design & Analysis, Database Technology, Computer Architecture, Computer Security, Proof-Based Linear Algebra, Probability Theory, Machine Learning, Differential Geometry, Model Theory & Mathematical Logic

## SKILLS & INTERESTS

---

- **Programming Languages & Tools:** Python, C, JavaScript, Java, SQL, Git, Unix, LaTeX
- **Full-Stack Development:** Node.js, FastAPI, React, Conductor, PostgreSQL, AWS, OCI
- **Data Science/ML:** Scikit-learn, NumPy, PyTorch, JAX, OpenCV, Matplotlib
- **Interests:** Mathematics, Cooperatives, Bayesian Inference & Active Inference, Traveling, Rock Climbing, Cooking, Video Games
